

# Sage Accpac ERP

## Advanced Accounting and Operations Software

Sage Accpac ERP is an advanced accounting application built on a world-class, object-oriented, and multi-tiered architecture.

RDA Group specialise in the selection, implementation and support of the Sage Accpac Enterprise Resource Planning (ERP) system to solve your financial and business management needs.

Sage Accpac ERP is an accounting and operations software solution that puts your business first - it serves up the smart features and fierce power you and your employees need to get the job done efficiently. It is adaptable to your growth and your unique workflow, defers to your database and deployment preferences, and flexes with your organisational structure.

*"Sage Accpac ERP offers freedom of choice, seamless integration, high performance and reliability that you can count on to increase your profitability and gain competitive advantage."*

## Integration with CRM Products

Tight integration between Sage Accpac ERP and other CRM systems enables everyone in your organisation - from administration and accounting to sales and marketing - to work together in the business of building profitable customer relationships. Integrating your CRM with Sage Accpac ERP gives your employees greater customer insight by enabling them to:

- Quickly identify cross-sell and up-sell opportunities
- Easily access payment history information
- Identify additional purchasing power (or lack of)
- Identify availability of products for your sales team
- Quickly assist customers with order status
- Generate more accurate quotes and proposals

**Authorised Partner**

## World-Class Architecture

Sage Accpac ERP is built on a world-class architecture. Designed for companies of all sizes, Sage Accpac ERP can be deployed both as a Web-based and desktop application, and is the foundation for an integrated set of end-to-end business management applications.

You choose the solutions that work best for you - the applications, database and deployment options, the user interface and languages, the network environment or operating system, add-on software and the customised features that help you operate more efficiently and profitably.

## Ultimate Scalability

Servicing single-user remote locations to large corporate environments with demanding accounting needs, Sage Accpac ERP is an extremely scalable product. This solution allows you to seamlessly upgrade from one edition to the next as your business requirements expand. When you upgrade, your data and custom reports easily move with you.

All Sage Accpac ERP editions have an identical user interface, making it easy to adapt to the next edition without costly staff retraining or data conversion. It also enables data processing to be distributed across multiple servers, so as your number of users increase, multiple servers can share the processing load.

*“Sage Accpac ERP has the ability to rapidly implement business-to-business electronic transactions. Subsequently this enables your accounts team to provide the best customer service.”*
